*Items listed are typically kept in our inventory. Please consult your physician or occupational therapist with any questions regarding these items. If we do not have an item on hand, or an item is requested that is not listed, we will consider purchasing the item for you as our budget allows. Please note that we will not purchase items that are disposable, e.g. toothbrushes for suction machines or BiPAP supplies.

Eating & Dining Tools

Universal Cuff

Item assists person to independently hold tools. Cuff fits over palm of hand via elastic band or Velcro closure and has a slot to hold person's flatware/toothbrush/pen.

Built-Up Utensils

Eating utensils (fork, knife, and spoon) with thick handles to help increase independence for those with weak or painful grip. Some utensils feature a curved design (image right) to help minimize upper extremity movement while eating.

Rocker Knife

Offers easy cutting for people with limited hand strength. Knife utilizes a rocking motion to cut food.

Drinking Straws

Extended straw helps reduce movement of person while drinking. Made with flexible polyethylene, comes with a 3/16"-diameter hole, 18" in length.

Eating & Dining Tools

Pat
Saunders
Straws

A straw that features a one-way valve to keep straw full of liquids at all times even after user removes their lips. Also features clips to attach straw to the side of a glass or cup. Typical length is 10".

Nosey
Cups

A plastic drinking glass with a special cutout helps maintain proper head and neck positioning when swallowing and making drinking easier. Glass comes in various sizes.

Scoop
Plates

Plates feature contoured lip on one side, allowing food to be trapped and easily pushed onto cutlery. Most plates have a non-skid bottom to prevent slipping and sliding.

Adaptive
Cutting Board

Plastic or wooden cutting boards are made to hold the item to be sliced or diced firmly in place with aluminum food spikes. Food guards in one corner prevent food from sliding off the board and suction cups on the bottom attach it to the work surface.

Eating & Dining Tools

Regulating
Drinking
Cup

A special cup that delivers a fixed amount of liquid with every drinking motion. The cup provides measured small amounts of liquid without the use of thickeners. Helps preserve the dignity of those who suffer from difficulties in swallowing. Cup has broad base to minimize tipping and spilling.

Multi-Opener

Features durable and comfortable grip. Some tools may open six different types of seals and lids: bags, safety seals, pull tabs, bottle caps, bottle tops and jar lids.

Automatic
Jar & Can
Opener

Electric jar opener that easily releases vacuum-sealed lids for those with limited hand strength. It features push-button operation, adjustable height, and large release button. Batteries often required.

Dressing Tools

Zipper Pulls

Assists in closure of zippers for persons who have limited finger grasp. Metal clip attaches to zipper tab. Monofilament loop can be tucked out of sight. Also available as a ring attachment.

Dressing Stick

Suitable for individuals who have difficulty bending, limited range of movement, or use of just one arm or hand. Lightweight reacher features a small C-hook at one end and a large, plastic-coated push/pull hook at the other. Average length is 26" long.

Long Shoe Horn

Slip into shoes without bending, bruising heels or crushing backs of shoes. Average length is 24". Some may have a rubber grip handle.

Button Hook & Zipper Pull

Two devices in one to help a person dress themselves. The looped end slides through a button hole, over and around a button, and then pulled back through the button hole. The C-hook on the opposite end is used for pulling zippers. Item also comes in compact form where the button hook and zipper pull fold in and out of the handle.

Dressing Tools

Pant
Extender

A small device to help make it easier buttoning pants for those with limited dexterity. Button hooks into button hole of pants, loop attaches to pant button.

Sock Aid

A device to help person put on socks. As a piece of plastic in a semicircle shape with a rope handle, the sock slips on one end, then is laid on the floor, foot inserted into sock, then by holding the handles the sock aid is pulled up onto the foot and lower leg.

Elastic
Shoelaces

Shoelaces provide better support, no special tying or lacing. Once shoelaces are thread through shoe and tied at the top, person can easily slip shoes on and off.

Daily Assist Tools

Reacher

Lightweight aluminum makes the reacher light and easy to hold. Some reachers may include 2-1/2" jaw opening and a rubber tip to assure a secure hold on items. It also includes a magnet for picking up metal objects, and a post on the end for use in pulling items closer or as an aid with dressing. Other models feature circular rubber tips on the jaw end.

Foam Tubing

Hollow foam tubing that can be used to build up utensils and tools for a better grip. Tubing can be cut to desired length. Slip resistant coating; does not absorb water.

Dycem Non-slip Matting

Non-slip matting helps keep items in place. Matting can be cut to desired shape and size.

Daily Assist Tools

Mobile
Arm
Support

Supports the forearm with an armrest sized to fit the user. The forearm support rests on an aluminum channel and slide, which adjusts the vertical height of the forearm. The arm piece is connected to the aluminum base with a ball-and-socket connection, allowing a 360-degree rotation.

Leg Lifter

For those who have limited lower extremity strength; helps lift the leg and foot onto a wheelchair footrest, bed, into a car, etc.

Handybar

Multipurpose tool for use in a vehicle. Provides support when exiting vehicle, fits in the door latch, no modifications necessary; ergonomic handle has non-slip surface; pointed metal end safely breaks window glass in case of emergency; features a blade for cutting seatbelt in case of emergency. 350lbs weight capacity.

Daily Assist Tools

Lamp
Switch
Enlarger

Enlarger helps person turn on and off lamps more easily. It's designed to fit over most lamp switch knobs.

Doorknob
Extender

Installed over doorknob, providing leverage to turn the knob. Fits knobs 2"– 2-1/2" in diameter. Handle is 2- 1/2" long. (Rubber version is Latex free)

Key
Turner/Holder

Small device holds up to 5 keys with adjustable tension so keys can be placed at the most comfortable angle. Sturdy plastic handle helps person hold onto keys as they turn them in locks. (Varying styles)

Grooming Tools

Fingernail
Clipper

Fingernail clipper is mounted to a small board; most models come with a suction cup base to secure item to a table.

Long-handled
Brush & Comb

Extended handle on comb provides maximum reach with minimum effort for person.

Long-handled
Sponge

Extended handle on sponge provides maximum reach with minimum effort for person.

Recreational Tools

Playing
Card
Holder

Either Wooden or Plastic holders for playing cards. Grooves in item hold cards in place.

Playing Card
Shuffler

Battery-operated device automatically shuffles cards.
